Summary

Certified Cyber Criminologist with hands-on experience in OSINT, fraud analysis, and network penetration testing. Currently preparing for HTB CPTS certification with focus on vulnerability assessment and security automation. Proficient in Python scripting and security tools. Seeking roles in cybercrime investigation or network security.

Education

Babu Banarasi Das University

Bachelor of Computer Applications in Cyber Security & Forensics

Aug. 2023 – Present

Lucknow, Uttar Pradesh

- **Relevant Coursework:** Network Security, Digital Forensics, Cryptography, Cloud Computing, Linux Administration, Identity & Access Management, Python Programming, Web Development, Operating Systems

Technical Skills

Programming: Python, MySQL, Bash, JavaScript

Frameworks & Web: Django, Flask, Tailwind CSS

Penetration Testing: Burp Suite, Nmap, Metasploit, Wireshark, John the Ripper, Hashcat

Reverse Engineering & Forensics: Ghidra, IDA Pro, Binary Ninja, Autopsy, Zeek, NetworkMiner

Platforms & DevOps: Linux, Windows, Git, Docker, AWS

Experience

Certified Cyber Criminologist

Virtual Cyber Labs (AICTE-Approved) - Score: 90%

July 2024 – Dec 2024

Online

- Conducted 20+ simulated cyber fraud investigations using OSINT techniques and social media analysis
- Analyzed 15+ fraud cases including phishing scams, card cloning, and cryptocurrency transactions
- Reverse-engineered 5+ Android APKs to identify security vulnerabilities and hidden APIs
- Traced blockchain transactions and investigated NFT fraud using open-source intelligence methods

Projects

Apna Neo Finance Bank | Django, Python, Tailwind CSS

July 2025 – Aug 2025

- Built a secure banking simulator with NEFT/IMPS/RTGS/UPI transfers and encrypted transaction processing.
- Integrated virtual debit card, UPI ID, and KYC document upload for seamless digital onboarding.
- Developed branch locator and admin dashboard with Django authentication and SHA256 password hashing.

RecoNet - OSINT Platform | Flask, Python

May 2025

- Developed OSINT web platform integrating WHOIS, DNS resolution, IP lookup, and geolocation modules
- Built Flask-based authentication system with secure login/logout and admin management panel
- Implemented input validation, error handling, and data saving for organized investigation workflows

Email Gen Mod | Python

May 2025 – Jun 2025

- Developed an automated email permutation generator for OSINT and reconnaissance purposes
- Generates all possible email combinations using first, middle, and last names with custom domain input
- Supports numeric and symbolic permutations, plus index-based insertion

Certifications

Ethical Hacking and Cyber Security (EHCS) — Bitten Tech — 2023

Focus Areas: Footprinting and Reconnaissance, Network Scanning, System Hacking, Web Application Security, Malware Analysis, Sniffing & Spoofing, Session Hijacking, Enumeration, Digital Forensics, and Social Engineering.

Certified Cyber Criminologist — Virtual Cyber Labs (AICTE-Approved) — 2024

Focus Areas: Blockchain analysis, financial fraud, fake application and scam website analysis, social media crime investigation, evidence collection, log analysis, phishing analysis.

Cyber Awareness Program — NIELIT, Government of India — March 2024

Focus Areas: Cyber hygiene, online fraud prevention, and safe digital practices.
